# SYED WAQAR RAZA ZAIDI

## AI ENGINEER | PYTHON AUTOMATION & SOFTWARE DEVELOPER

Islamabad, Pakistan | +92 332-8569629 | syedwaqarraza27@gmail.com | GitHub: github.com/waki44 | github.com/waki_44

## PROFESSIONAL SUMMARY

AI Engineer and BS Artificial Intelligence student with hands-on experience building AI-powered applications, LLM integrations, computer-vision demos, Python automation tools, and full-stack applications. Experienced with Python, PyTorch, Hugging Face Transformers, FastAPI, REST APIs, and web/mobile interfaces. Developing deeper machine-learning skills with a long-term goal of specializing in ML engineering. Brings project ownership, team coordination, and a focus on practical, maintainable software.

## TECHNICAL SKILLS

**AI & Machine Learning:** PyTorch, Hugging Face Transformers, Salesforce BLIP, scikit-learn, model inference, computer vision, NLP, neural networks, transfer learning, prompt engineering

**Generative AI & LLMs:** LLM API integration, Retrieval-Augmented Generation (RAG), semantic search, vector databases, conversational AI, local LLM orchestration, agentic workflows

**Programming:** Python, JavaScript, TypeScript, C++, Java, Bash, HTML5, CSS3

**Web, Mobile & UI:** React.js, React Native, Expo, Tailwind CSS, Shadcn UI, Android Jetpack Compose, CustomTkinter, Gradio

**Backend & Data:** FastAPI, REST APIs, MongoDB, Pandas, NumPy, Matplotlib, Recharts, Pillow, Requests, web scraping, data processing

**Tools:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook, VirtualBox, Cursor AI, Lovable AI

## EXPERIENCE & LEADERSHIP

**Tech Lead & Content Creator** | Duo Byte AI (@duobyte_AI)

- Created educational technology content covering AI tools, developer utilities, productivity applications, and student resources.
- Produced practical tutorials demonstrating AI-assisted tools and software-development workflows.

**Academic Project Team Lead** | Federal Urdu University of Arts, Science and Technology (FUUAST)

- Led project teams typically consisting of 3–4 students, coordinating planning, task allocation, progress, and final delivery.
- Reviewed and integrated team contributions, helped resolve implementation issues, and checked deliverables before submission.
- Built experience in team coordination, ownership, quality review, and delivery planning.

## SELECTED PROJECTS

**Automated Database Code Audit Tool**

Technologies: Python, Database Schema Analysis, Security & Compliance

- Developed an Automated Database Code Audit tool designed to streamline security and compliance checks.
- Automated the analysis of database schemas and queries to identify vulnerabilities and optimize performance.
- Available on GitHub; focuses on enhancing database reliability and security standards.

**GymPro — Gym Management System**

Technologies: React.js, FastAPI, MongoDB, Tailwind CSS, Recharts

- Built a full-stack gym-management application for member registration, membership records, fee tracking, expiry alerts, and dashboard analytics.
- Added workout-category filters and monthly revenue visualizations.
- Live demo: workout-fee-manager.preview.emergentagent.com/

**DataNest AI Assistant — Desktop AI Operator**

Technologies: Python, CustomTkinter, Google Gemini API

- Developed a Windows desktop assistant with a custom graphical interface and API-connected language-model workflows.
- GitHub: github.com/waki44/DataNest-AI-Assistant

**AI Content Detector — Multimodal Web Application**

Technologies: HTML, CSS, JavaScript, Claude API, Hugging Face Inference API

- Built a web interface for text and image analysis, with confidence scores and explanatory analysis outputs.
- GitHub: github.com/waki_44/ai-detector

**Image Caption Generator**

Technologies: Python, PyTorch, Hugging Face Transformers, Salesforce BLIP, Gradio

- Implemented image-caption generation using BLIP model inference and an interactive Gradio interface.

**RumiCloud Share Space — File-Sharing Platform**

Technologies: Full-stack web architecture, cloud-storage integration, Lovable AI

- Developed a cloud-based file-sharing prototype with uploads, shareable links, and file-management workflows.
- Demo: preview--rumicloud-share-space.lovable.app/

**RAG Portfolio Agent & LLM Utilities**

Technologies: Python, vector databases, semantic search, conversational LLM APIs, REST APIs

- Designed a conversational portfolio-agent architecture using semantic retrieval and retrieval-augmented responses.
- Built a local multi-model API-wrapper/testing environment and Python utilities for file organization, web scraping, and data processing.

## EDUCATION

**BS Artificial Intelligence** — Federal Urdu University of Arts, Science and Technology (FUUAST) | Islamabad, Pakistan
Semester 5 | Expected graduation: 2028

**Intermediate in Computer Science (ICS)** — Federal Board of Intermediate and Secondary Education (FBISE) | Islamabad, Pakistan

## CERTIFICATIONS

- Crash Course on Python — Google / Coursera (Verified Certificate)
- Python for Data Science, AI & Development — IBM / Coursera (Verified Certificate)
- Machine Learning Course — Innovista Learn Easy
- Critical Thinking in the AI Era — HP LIFE
- CS101: Introduction to Programming I — Saylor Academy
- ChatGPT and OpenAI API — freeCodeCamp / Cursa

## LANGUAGES

Urdu: Native | English: Intermediate
